Symbol Cross Reference Table in Alphabetical order	58

Overview

This document provides a summary of commodity symbols selected by the various exchanges comprising the ITC Committee, or exchanges wishing to include their respective symbols within this document.

Symbols selected by a particular exchange may be chosen from the attached reference guide, and may or may not be duplicates of symbols already in use by other exchanges. The ITC Committee's goal is use of unique symbols, but this goal is unenforceable.

Organization of Reference Guide

This document is comprised of a list of Commodity Codes elected by each exchange together with the respective commodity description and Fractional Identifiers (where known).

**Inter – Exchange Technical Committee
Symbol Reference Guide**

A recapitulation of Commodity Codes is also provided in tabular form. Each two (2) C/A Character Commodity Code is shown in the tables with the columns representing the first letter of the code and the rows representing the second letter in the code. Exchange ID codes, for an exchange utilizing the particular symbol represented by the column and row, are also identified.
